

Troubleshooting Guide for Hinge Door

1. Do the finished measurements on the tray comply with the adjustments listed in the product specifications book?
2. Is the tray level and secured?
3. Are the wall profiles stepped in the recommended 20mm?
4. Are the wall profiles plumb, checked with a plumbing line/spirit level?
5. Is any part of the enclosure overhanging the outer edge of the shower tray?
6. Is the door closing evenly on the ball catches?
7. Is the bottom deflector strip seal at the bottom of the door intact?
8. Is the unit correctly sealed with silicone?
9. Check to ensure the door frame is 100% square.
