

Troubleshooting

Corner Door

1. Ensure tray and walls are level and within defined min and max levels? (See Page 2 of the site installation instructions for this particular product.)
2. Ensure the wall profiles are stepped in 20mm. (See Page 2)
3. Have the wall profiles been checked with a plumbing level or spirit level to ensure they are plumb?
(Page 1)
4. Has the silicon been applied and the unit sealed correctly as per instructions? (Page 5)
5. Have the magnetic seals been damaged at all?
6. Are the doors meeting evenly along the magnetic seal?
7. Do the finished measurements on the tray comply with the adjustments listed in the product specifications book?
8. Do the rollers need to be adjusted? (See page 5)

Is the unit been used in conjunction with a power shower? Although the shower is power shower safe it is advisable to ensure the seals are not being subjected to the jets directly.
