

Troubleshooting

Hinge Door

1. Do the finished measurements on the tray comply with the adjustments listed in the product specifications book?
2. Is the tray level and secured? (See section 2 of the site installation instructions for this particular product.)
3. Are the wall profiles stepped in the recommended 20mm? (See section 3.)
4. Are the wall profiles plumb, checked with a plumbing line / Spirit level?
5. Is any part of the Enclosure overhanging the outer edge of the shower tray?
6. Is the door meeting evenly along the magnetic seal?
7. Is the gasket at the bottom of the door intact?
8. Is the unit silicon sealed correctly? (Section 15.)
9. Is there a tiling up-stand fitted to the tray in front of the door opening?
10. Have the wiper seals been correctly applied?

Is the unit been used in conjunction with a power shower? Although the shower is power shower safe it is advisable to ensure the seals are not being subjected to the jets directly.
